Smart Video Intercom - S

PRODUCT GUIDE

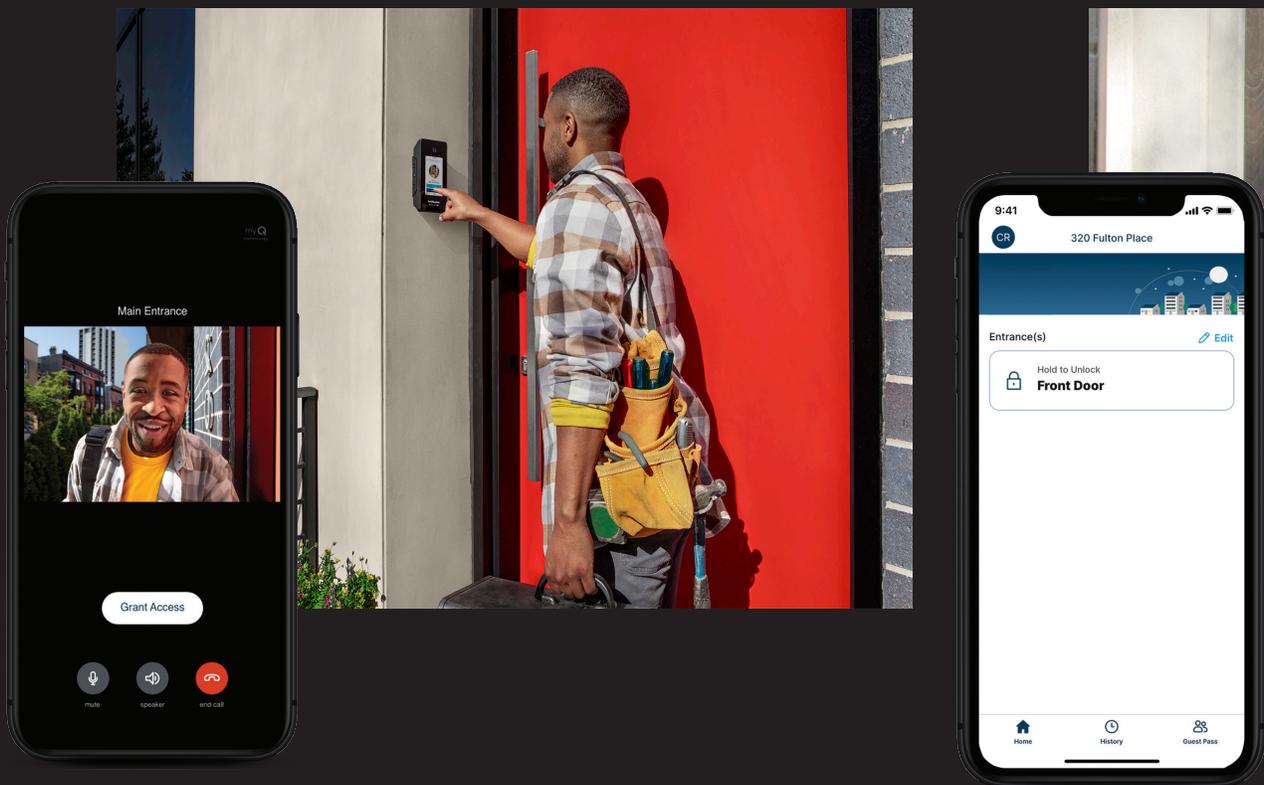

LiftMaster

POWERED BY myQ

A Smarter Way In for Smaller Buildings

The Smart Video Intercom-S is ideal for small buildings and single-family homes with gates. With stunning HD video live feed and recording, Smart Video Intercom-S lets property owners see what is happening in front of the building—day and night. The myQ® Community app and myQ mobile credentials makes life easier and safer for residents.

A Scalable Cloud-based Solution

Conveniently control and manage multiple door, elevator, and garage access points across all communities in your portfolio from a single dashboard. Streamline access management with myQ Community, a cloud-based platform that enables remote features such as adding/deleting residents, assigning access to specific entrances and monitoring guest/event requests. Plus, myQ Community has integration partnerships with Property Management Systems, Smart Building Platforms and Smart Locks (coming soon), including RealPage®, Yardi, and more. This allows community managers to save time by connecting to property management software for automatic tenant directory uploads.

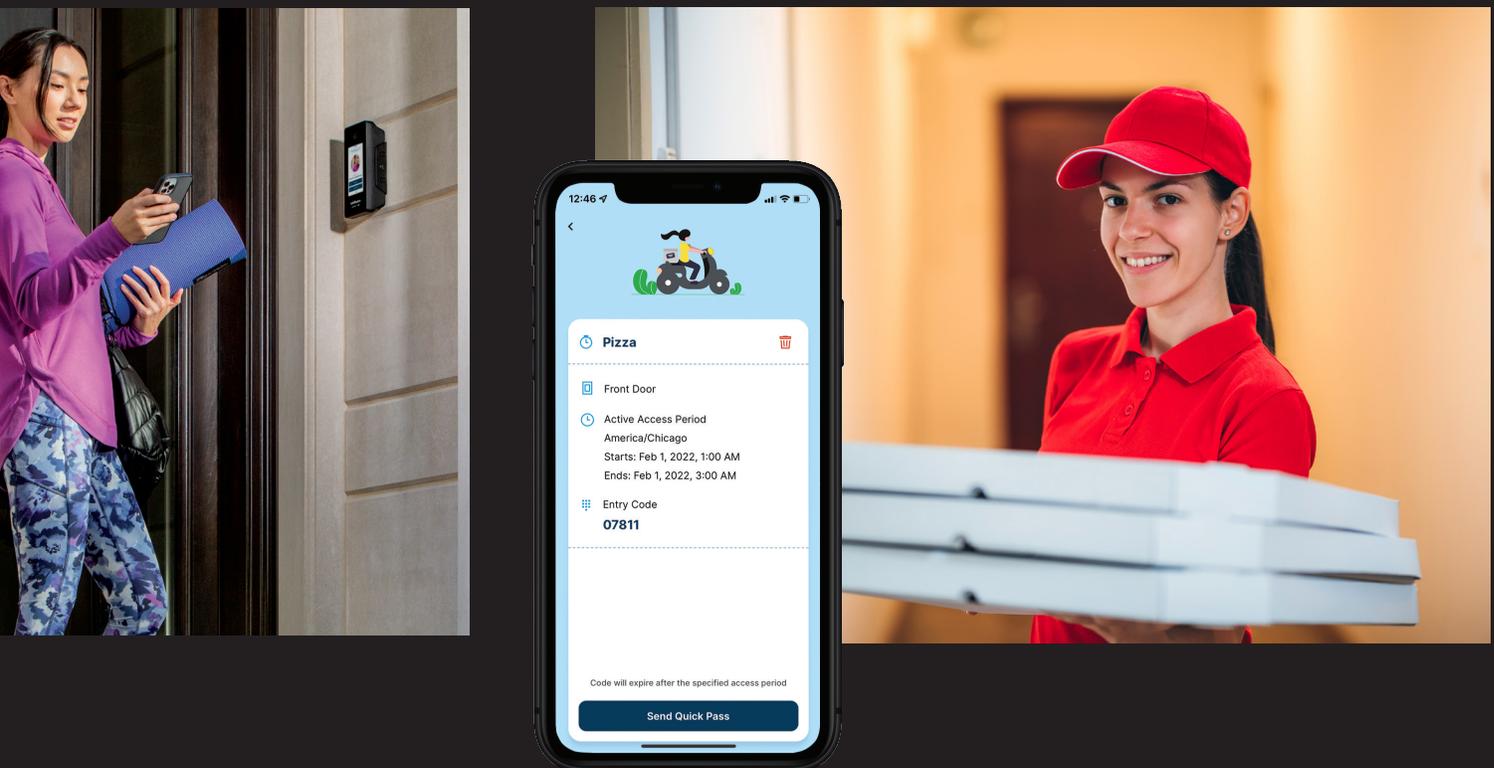

RealPage®
Certified
AppPartner

Your residents expect modern convenience, and Smart Video Intercom-S is a luxury amenity that sets your building apart. Using the myQ Community app, residents can identify visitors outside the door and confidently grant/deny access from anywhere with one-way video calling and two-way voice communication. They can also share recurring or one-time guest passes. Plus, with myQ Mobile Credentials, residents don't need a key fob; they can simply Tap the intercom with their smartphone or respond to a push notification Alert to unlock the door.

Ultimately, Smart Video Intercom-S is a unified solution that provides convenience and peace of mind—to you and your residents.

Enhance Your Security

With the required myQ Community subscription, you can securely manage how and when residents—and visitors—access each entrance across every community you manage. You will also receive real-time notifications and remote diagnostics to detect and address issues before your residents are aware of them. myQ Mobile Credentials allows residents to seamlessly enter the community using their smartphones as an ultra-secure key. By eliminating physical credentials—which can be lost, stolen, or cloned—myQ Mobile Credentials makes it harder for intruders to breach the building, and easier for property managers to specifically track who is entering.

myQ Community App - A Smarter Way In

Give your residents the ability to manage property access from their smartphone. Through the app's one-way video calling and two-way voice communication, residents can safely identify guests and confidently grant/deny access from anywhere. Plus, community managers can get rid of key fobs and issue myQ Community app licenses instead. With myQ Mobile Credentials, smartphones are the new all-access pass to every entryway. Residents can use the app to send virtual guest passes or gain access with Apple Watch and Siri at any time, making multi-tasking easy by letting residents unlock any door right from their wrists.

CAPXS

Smart Video Intercom - S

This Smart Video Intercom has an intuitive interface with a high-definition color touch display and picture-in-picture function to provide residents with the modern experience they desire.

Popular Features

Designed to IP54 weather protection rating for dust and water. Meets IK07 impact rating to protect the touchscreen from damage

Durable, scratch resistant and capacitive 5-inch high-definition color display touchscreen

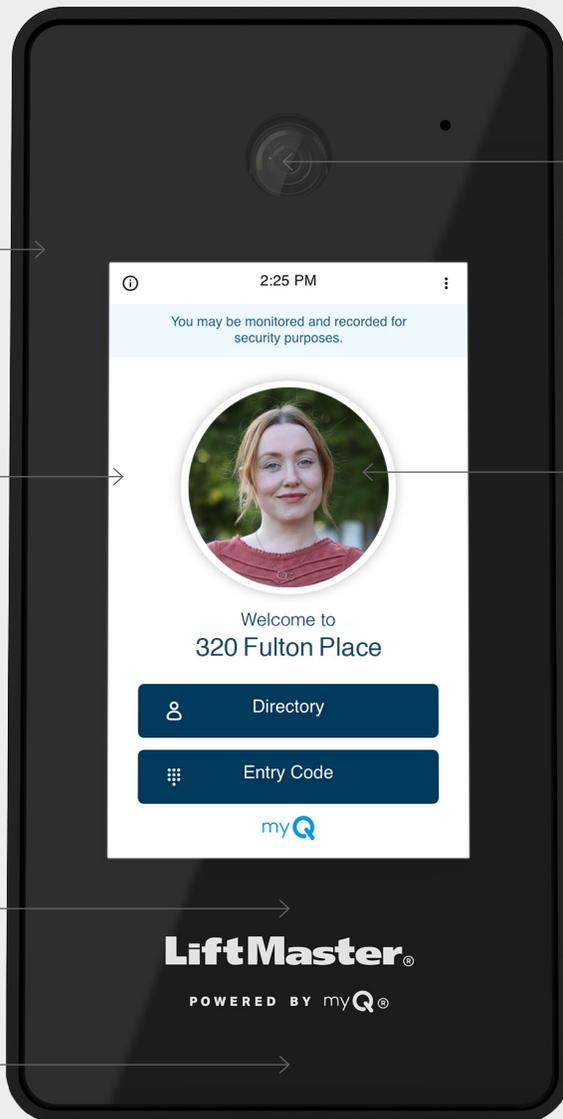

Postal Lock Trim Kit (optional)

Integrated BLE for myQ mobile credentials

Built-in speakers provide digital call quality

Integrated video camera captures video clips for every access event. With the myQ Community app, residents can visually verify guests before granting access

Picture-in-picture function

myQ Community App

- Gives residents the ability to manage property access from their smartphone
- Residents can safely identify guests and confidently grant/deny access from anywhere
- With myQ Mobile Credentials, residents receive ultra-secure, encrypted access—using their smartphone and the myQ Community App as an all-access pass to get around the building
- Residents can “press to unlock” any authorized door/gate for themselves or visitors
- Virtual guest / delivery passes can easily be sent for one-time or recurring use

Customized System Control

- Simply add and delete tenants from the myQ Community dashboard whenever someone moves in and out; easily programmable
- Saves time and money of having to re-program or re-key hardware systems or issue physical keys or cards with every move
- Configurable email notifications alert you when a suspended code is used, tell you when codes are overused or if service is needed for the Smart Video Intercom or Smart Controller

Integrated Camera

- 135° wide angle camera provides a view of access points through a live feed or recorded event through the myQ Community web platform
- Receive alerts and HD video recordings when an access event is triggered
- Night vision functionality for greater image quality in high and low light environments
- Climate performance includes extreme climate operating range of -4° to 122°F

Engineering and Diagnostic Capabilities

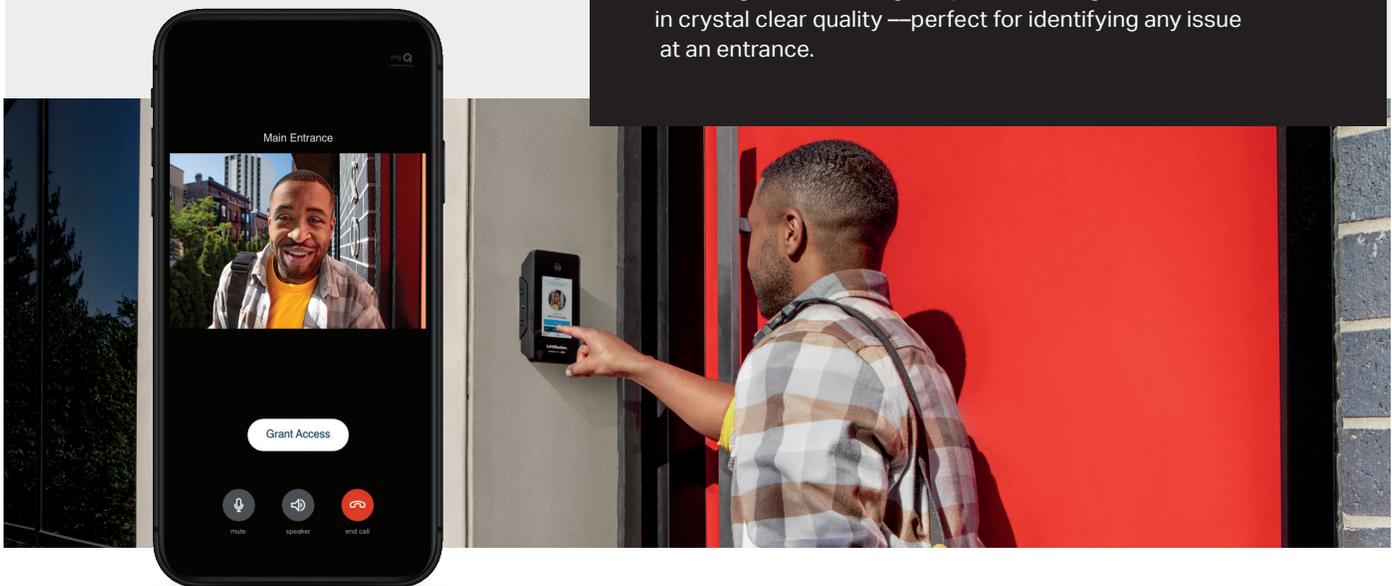

- Fade resistant, high-definition color touch display
- Advanced self-diagnostics reduce downtime by troubleshooting and identifying when service is needed
- UL 294 listed for commercial settings

Cloud-based Security

- Two-factor authentication protects and safeguards resident data
- Easily connects to myQ Community so you can manage your properties remotely without having to be physically present
- Meets California Consumer Privacy Act (CCPA) requirements

See Everything in Wide-angle Video

The integrated camera gives you a wide angle video stream in crystal clear quality—perfect for identifying any issue at an entrance.

Enhance Your Smart Video Intercom System

Paired with our full line of LiftMaster® smart accessories allows you to go beyond just the perimeter.

CAP2D*

Smart Access 2-Door Controller

CAP2D provides opportunity to add secure access to a resident-only back door, package room, gym, pool or parking garage.

CAPXSHOOD

Hood for CAPXS

Ideal for overly bright applications.

SRDRST / SRDRKP

Smart Readers

Multi-technology readers enable myQ Mobile Credentials at additional doors for seamless access throughout the property. Also compatible with common physical credentials.

CAPXSGNB

Pedestal Bracket

Alternate bracket accessory to specifically mount the CAPXS to a pedestal plate.

CAPXSTKPL / CAPXSTK

Trim Plates for CAPXS

Trim plate options with and without a postal lock.

Subscription and Storage

All Smart Access Solutions require a monthly subscription to myQ Community. Tailor the subscription for your community by increasing the number of app licenses or expanding your video storage capabilities to 30 days.

*All LiftMaster Smart Access Solutions (including CAPXLV, CAPXM, CAPXS, CAP2D, and CAPAC) require monthly subscriptions to a myQ Community plan. Contact your Dealer or LiftMaster Representative to tailor a subscription plan to fit your property's needs.
